

KRIZZA HEART N. ESPERAS

Junior Full-Stack Developer

[Portfolio](#) | [Github](#) | [LinkedIn](#)

SUMMARY

Junior Full-Stack Developer with hands-on experience designing, developing, and deploying web applications using JavaScript, TypeScript, Node.js, PostgreSQL, and Supabase. Built and deployed a production-ready Human Resource Information System (HRIS) during a Web Developer Internship. Passionate about building scalable applications, solving real-world problems, and continuously learning modern web technologies.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python

Backend: Node.js, REST APIs

Frontend: HTML5, CSS3, Responsive Design

Database: Supabase, PostgreSQL

Tools: Git, GitHub, VS Code, Vercel, Figma, Canva

PROFESSIONAL EXPERIENCE

Highly Succeed Inc. | Web Developer InternFebruary – May 2026

- Independently designed, developed, tested, and deployed a full-stack Human Resource Information System (HRIS) for employee management.
- Built secure authentication and employee management modules using JavaScript, TypeScript, Node.js, and Supabase.
- Designed relational database schemas and implemented CRUD operations for efficient employee record management.
- Deployed the application on Vercel and ensured system reliability through testing and maintenance.
- Collaborated with supervisors to translate business requirements into functional solutions.

PROJECTS

TricyPay – Smart Transportation Management SystemJanuary – December 2025

Mobile & IoT Developer | Team Project

Technologies: Flutter, Arduino, IoT, Firebase, Supabase, Node.js

- Developed mobile and IoT features for a smart transportation management system.
- Implemented automated fare computation, cashless payment processing, and change dispensing.
- Built real-time monitoring features for transportation operations.
- Collaborated with a multidisciplinary team to integrate mobile and IoT components.

Autonomous Egg Quality Sorting System Using IoT & Image ProcessingFebruary – December 2024

IoT Developer | Team Project

Technologies: Raspberry Pi, Python, OpenCV, IoT, Data Logging

- Developed an IoT-enabled egg quality classification system using image processing techniques.
- Implemented automated sorting based on egg size, quality, and shape.
- Assisted in real-time monitoring and data logging for inventory management.
- Improved grading consistency by reducing manual inspection.

Cam Commute Guru – Tricycle Commuter Safety & Fare Assistance AppNovember – December 2023

UI/UX Designer | Academic Project

Technologies: Figma, UI/UX Design, User Research, Prototyping, Mobile UI

- Designed user-centered mobile interfaces for safer and more accessible commuting.
- Created QR code verification and fare calculator interface designs.
- Designed an incident reporting workflow to improve commuter safety.
- Produced wireframes and interactive prototypes following UI/UX best practices.

EDUCATION

University of Camarines Norte State

Bachelor of Science in Information Technology

June 2026

AWARDS AND RECOGNITION

- Academic Distinction Awardee (2026)
 - Best Capstone Project – TricyPay Smart Transportation Management System (2026)
 - Special Citation for Research Publication – Agent-Based Simulation and GIS Mapping of Tuberculosis Transmission (Zenodo)

CERTIFICATES

- Cisco Networking Basics
 - Google Technical Support Fundamentals (Coursera)
 - BITSCON 2024
 - From Scroll to Skill – ICT Seminar
