

KRIZZA HEART N. ESPERAS

Junior Full-Stack Developer

krizzaheart.esperas@gmail.com | +63 962 832 9574

[Portfolio](#) | [LinkedIn](#)

SUMMARY

Junior Full-Stack Developer with hands-on experience designing, developing, testing, and deploying web applications using JavaScript, TypeScript, Node.js, HTML5, CSS3, PostgreSQL, Supabase, and REST APIs. Independently developed a full-stack Human Resource Information System (HRIS) during a Web Developer Internship and contributed to academic software projects. Strong analytical, problem-solving, and technical communication skills with a passion for software engineering and AI technologies.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript, TypeScript
Backend: Node.js, REST APIs, CRUD Operations
Database: Supabase, PostgreSQL
Tools: Git, GitHub, VS Code, Vercel, Vite
UI/UX: Figma, Wireframing, Prototyping, User Research

PROFESSIONAL EXPERIENCE

Highly Succeed Inc. | Web Developer Intern **February – May 2026**

- Designed, developed, tested, and deployed a full-stack Human Resource Information System (HRIS) using JavaScript, TypeScript, Node.js, Supabase, and REST APIs.
- Built secure authentication and employee management modules using JavaScript, TypeScript, Node.js, and Supabase.
- Designed relational database schemas and implemented CRUD operations for efficient employee record management.
- Deployed the application on Vercel and ensured system reliability through testing and maintenance.
- Collaborated with supervisors to translate business requirements into functional solutions.

PROJECTS

Kling Ordering System – Digital Ordering & Management Platform **June – July 2026**
Full-Stack Developer | Team of 2
Technologies: JavaScript, TypeScript, Node.js, Supabase, Vercel

- Designed and developed a full-stack digital ordering platform using JavaScript, TypeScript, Node.js, and Supabase.
- Implemented secure authentication, product management, order processing, and user account management.
- Built RESTful APIs and database operations to support efficient and scalable business workflows.
- Deployed the application on Vercel and optimized performance, responsiveness, and security.

TrickyPay – Smart Transportation Management System **January – December 2025**
Mobile & IoT Developer | Team Project
Technologies: Flutter, Arduino, IoT, Firebase, Supabase, Node.js

- Developed mobile and IoT features for a smart transportation management system.
- Implemented automated fare computation, cashless payment processing, and change dispensing.
- Built real-time monitoring features for transportation operations.
- Collaborated with a multidisciplinary team to integrate mobile and IoT components.

Autonomous Egg Quality Sorting System Using IoT & Image Processing **February – December 2024**
IoT Developer | Team Project
Technologies: Raspberry Pi, Python, OpenCV, IoT, Data Logging

- Developed an IoT-enabled egg quality classification system using image processing techniques.
- Implemented automated sorting based on egg size, quality, and shape.
- Assisted in real-time monitoring and data logging for inventory management.
- Improved grading consistency by reducing manual inspection.

EDUCATION

University of Camarines Norte
Bachelor of Science in Information Technology
June 2026

AWARDS AND RECOGNITION

- Academic Distinction Awardee (2026)
- Best Capstone Project – TrickyPay Smart Transportation Management System (2026)
- Special Citation for Research Publication – Agent-Based Simulation and GIS Mapping of Tuberculosis Transmission (Zenodo)

CERTIFICATES

- Cisco Networking Basics
- Google Technical Support Fundamentals (Coursera)
- BITSCON 2024
- From Scroll to Skill – ICT Seminar
