

KRIZZA HEART N. ESPERAS

Junior Front-End Developer | React, Next.js & TypeScript

krizzaheart.esperas@gmail.com | [Portfolio](#) | [LinkedIn](#) | +63 962-832-9574

SUMMARY

BSIT graduate with hands-on experience developing, testing, and deploying responsive web applications using React.js, Next.js, JavaScript, TypeScript, HTML, CSS, Node.js, and REST APIs. Experienced in translating UI/UX requirements into functional interfaces, integrating backend services, and troubleshooting application workflows. Proficient in AI-assisted development using Cursor, GitHub Copilot, and Claude, with strong attention to detail and a focus on building reliable, user-friendly web experiences.

TECHNICAL SKILLS

Frontend: React.js, Next.js, JavaScript, TypeScript, HTML5, CSS3, Responsive Web Design, UI/UX

Backend & APIs: Node.js, REST APIs, API Integration, CRUD Operations

Database: PostgreSQL, Supabase, SQL, Firebase

Tools: Git, GitHub, Cursor, Claude, GitHub Copilot, Vercel

Development: Application Testing, Troubleshooting, Responsive Design, AI-Assisted Development

PROFESSIONAL EXPERIENCE

Highly Succeed Inc. | Web Developer & Data Management Intern February – May 2026

- Designed, developed, tested, and deployed a full-stack **Human Resource Information System (HRIS)** using PostgreSQL, Supabase, React.js, Next.js, TypeScript, and Node.js.
- Managed and validated structured database information, performed CRUD operations, and tested system workflows to support data accuracy and reliable application processes.
- Performed data encoding, product information verification, documentation, and data organization while supporting day-to-day digital operations.

PROJECTS

Kling Ordering System – Digital Ordering & Management Platform June – July 2026

Full-Stack Developer | Team of 2

Technologies: React.js, Next.js, JavaScript, TypeScript, Node.js, Supabase, PostgreSQL, REST APIs, Vercel

- Developed a digital ordering and management platform supporting product management, ordering, authentication, and user account workflows.
- Managed structured information through frontend interfaces, backend services, databases, and API integrations.
- Tested and validated system workflows while resolving issues and collaborating with team members.

TricyPay – Smart Transportation Management System January – December 2025

Mobile & IoT Developer | Team Project

Technologies: Flutter, Arduino, IoT, Firebase, Supabase, Node.js

- Developed digital features supporting transportation monitoring, automated fare computation, and cashless payment workflows.
- Managed data and integrated applications, backend services, databases, and IoT components.
- Tested and troubleshoot interconnected systems to support reliable operational processes.

Autonomous Egg Quality Sorting System Using IoT & Image Processing February – December 2024

IoT Developer | Team Project

Technologies: Raspberry Pi, Python, OpenCV, IoT, Data Logging

- Developed an automated egg classification and sorting system using Python, OpenCV, and Raspberry Pi.
- Processed and organized image-based information to support automated classification and decision-making.
- Implemented data logging and monitoring while testing integrated hardware and software workflows.

EDUCATION

University of Camarines Norte

Bachelor of Science in Information Technology

June 2026

AWARDS AND RECOGNITION

- Academic Distinction Awardee (2026)
- Best Capstone Project – TricyPay Smart Transportation Management System (2026)
- Special Citation for Research Publication – Agent-Based Simulation and GIS Mapping of Tuberculosis Transmission (Zenodo)

CERTIFICATES

- Cisco Networking Basics
- Google Technical Support Fundamentals - Coursera
- BITSCON 2024
